

SPIRITUAL WISDOM FROM THE FEMALE SYSTEM

The Bible is holy and sacred, the Bible was written for the purpose of serving God's will to guide His/Her children into deeper relationship with Him. There are three sources of distortion from the Bible to be considered while interpreting the Holy Scripture. 1) The Bible was written by people who carried an implant placed within the human consciousness, and this implant created some distortions while the prophets listened to God, like a radio station that briefly lost its signal, because the implant blocked that part of the message from getting through. 2) The Bible has been translated many times over, and like the game of telephone in which a whispered message is sent around the circle, the original message sometimes loses a word or two in translation. 3) The Bible was written by prophets and saints who had a relationship to God not unlike the Sufis did, a relationship that was passionately devoted, a relationship made possible through their openness to dialoguing with God through both their left and right-brains, and through their hearts.

When a person receives an inspiration or message from God, it arrives at a level beyond thought or notion, at a much higher frequency that can be reduced into words, and artwork would serve as a more comprehensive language to communicate these messages than words, but we needed the people who composed the bible to write it down for us. Interpreting the Bible with a mind open to artwork of communicating with God, with the understanding that God speaks to us in many languages is a way to release limitations on the capacity to hear God's messages. God speaks to us through the wind, through the rain, through the clouds and the sun, through symbols, through gestures, through images.

Genesis 1:27 "So God created man in his own image, in the image of God he created him; male and female he created them." The following passage has verbs that are not accurate, in that God did not ask the original humans to subdue or rule over His/Her creation. God made humans to be stewards to the body of life. God did not make the Plant Realm and Animal Realm and Mineral Realm to be owned or possessed by the humans, as all life on earth is God's property. When God gave every seed-bearing plant on the face of the whole earth to the humans, and every tree that has fruit with seed in it, God also gave the humans to the trees. God gave the plants to the humans, and God gave the humans to the plants.
