

POETRY OF SCIENCE LECTURE SERIES

CURE FOR PEDOPHILIA

This lecture discusses in-depth the thinking, chemical, and emotional patterns underlying the mental illness of pedophilia in a safe container by limiting discussion of this subject to the abstract realms and the essence of this illness rather than the forms it takes. The focus of this lecture is the solutions to addressing the epidemic of this mental illness, and how these solutions are big enough to match the wound.

ROOT OF DYSFUNCTION IN HUMAN RELATIONSHIPS

This lecture is the fun, juicy one that inspires ground-breaking research into the chemical patterns that promote violent behavior, and how these patterns can be addressed through either cognitive re-patterning or new inventions in medication. Although the scientific discoveries to be presented were derived through research on the chemical formation of the altered-ego, the altered-ego ego will not be discussed, but instead a description of the relationship between aura and mind will be reviewed. Students will walk away with fresh inspiration for researching the chemical patterning within social trends that promote conflict and objectification of members of the human species.

LAW OF THE MATERIAL REALM

This lecture is a purely scientific explanation of how the human being is both simultaneously inseparable from this solar system, and existing as a separate autonomous entity. Guided past concepts of dualism, students will review the relationship between body and mind, subjectivity and objectivity, and nature's tools for adaptation and evolution of the human species in concert with the environment. Attendees will walk away with a complete understanding of how it is possible for the human body to have access to all the facts of creation.

POWER

This lecture provides an alternative viewpoint of what it is to hold power and express power. The collective ego and altered-ego will be discussed as a contrast to human power. Attendees will walk away with an understanding of what drains personal power, what boosts personal power, and what emotional and mental patterns give the experience of the illusion of power-over others.

About the teacher

Chelsea M. Wright is a truth fairy, writer, poet, healer, scholar of writing on the wall about the fall of the Empire of Human Trafficking, visionary, research analyst, clairvoyant, and shaman. Ms. Wright has performed twelve years of independent study on her relationship to self, and has made groundbreaking discoveries on the chemical patterns within relationship dysfunction as expressed within the particles of emotion.
